🔗 Portfolio   ⬡ Mohdoalomar

Objective

Senior Software Engineering student with a strong academic background, specializing in Full-Stack web development, and AI. Seeking a co-op opportunity in a dynamic organization to apply my skills in creating innovative, user-friendly web and AI solutions, managing projects, and further developing my expertise in AI and full-stack development.

Education

Bachelor of Software Engineering   2021/08 – 2025/08
King Saud University   Riyadh, Saudi Arabia
GPA : 4.93 - *Excellent with First Honors Degree*

Projects

Tashalih ↗   2024/09 – Present
- Tashalih is a platform designed to revolutionize the used car parts industry, offering features such as car and parts search, and inventory management.
- I led the front-end development using React, creating a user-friendly interface tailored for both customers and dealers.
- I conducted load testing with Postman, contributed to the backend development using Django, and deployed the platform with AWS to ensure reliable performance.
- The project included market research with customers, dealers, and delivery agents to design a solution tailored to their needs.
- Tashalih was showcased at LEAP 2025, where I presented the platform to global tech leaders and investors, gaining valuable feedback and establishing industry connections.

Lammah ↗   2024/11 – 2024/11
Developed a responsive landing page for Lammah, using React, Framer Motion, GitHub, and Tailwind CSS. Collaborated with the CTO, navigating internal procedures, which helped me strengthen my teamwork, communication, and problem-solving skills while successfully deploying the project within a tight timeframe of one week.

AskCommunity   2023/09 – 2023/12
Developed a Stack Overflow-like platform using PHP, JavaScript, HTML/CSS, and MySQL, building both the front-end and back-end to support user interactions, questions, answers, and community features.
